

Before the year ends, we invite you to check out the new improvements to [UMT AUDIT software](#).

Read more to see how transferring your audits and inspections to an electronic format on a PDA / Tablet PC / PC using UMT Audit will save you time.

Happy Holidays to you and yours,
Erin Metcalfe, Laubrass Inc, www.laubrass.com

The Path to Compliance

UMT Audit offers you a complete path to compliance.

Step 1: Perform your audit on a PDA / Tablet PC or portable computer, giving you access to all the standards and regulatory information you need.

Step 2: Upload your data to your customized reports and online management system.

Step 3: Create and designate corrective action plans online.

Step 4: Responsible organization implements corrective action plans.

Step 5: Send the corrective actions back to the handheld computer to audit the corrective actions for full compliance to standards.

Step 6: 100% compliance.

Same Inspection, Same Report, Faster.

Introducing new technology can seem overwhelming and time consuming. If you've already got your inspection lists and have a report system you're happy with, you may ask why change?

Simple answer, you don't have to change. With UMT Audit we can take [your existing lists and reports](#) and replicate them into the software allowing you to take advantage of all the time savings involved when you minimize all your administrative tasks. You get to stick with what you're used to, but are able to complete your inspections faster.

Request a personal online demo to see if we can help you improve your current process while maintaining a familiar look and feel.

Benefits of automating your audits

One of our clients is saving close to 4000 hours annually by switching to UMT Audit, here's what she had to say:

"Using the handhelds has improved the auditing process in the field, freeing up the team's time to interact with customers. Since the implementation, the quality managers have been able to add two customer visits per month to the program, which includes reviewing the customer's fleet onsite. We are seeing happier, more productive employees with less turn over," -Senior Project Mgr, Quality Assurance

WEB AUDIT

Is your current method of filing and tracking all your audits and inspections working for you?

[WEB Audit can manage your Audit reports](#)

Using this new Web Portal will allow you to:

Promote **secure collaboration** and communication with your Audit Team

Create and **manage Corrective Action Plans** for the responsible organization with milestones

Audit corrective actions for full compliance to standards

Set **security features** and limits for individual users

Customize online report templates and interactive lists to organize your data base online

Completely manage your audits and non compliance in a secure and protected environment on your intranet or have it hosted externally.
