3 tips to increase business mobility

- Minimize the amount of non value adding tasks being performed in office by automating administrative processes
- Equip your team with standardized solutions for their mobile devices to enable easier integration of information
- Provide flexible & customizable solutions for your team to allow for an easier transition to mobile devices that suits your specific needs

Time studies for nurses

The Gettysburg Hospital in Pennsylvania needed a system that would allow them to measure TCAB initiatives and provide comprehensive analytical information to establish Non Value Adding Activities (NVA) that need improvement. They worked with one of Laubress' Partners, Rapid Modelling to utilize TimeStudyRM to take their TCAB initiative to the next step.

Who is doing what?

UMT Audit is being used for integral audits and inspections at some new important clients. Lockheed Martin is in the middle of a pilot study using UMT Audit for [5S audits](#). General Dynamics has also just finished training on using UMT Audit for various [ISO audits](#) and other inspections. An Established Canadian healthcare facility is in the process of setting up a customized version of WCB Audit at their facility to standardize their [healthcare audits](#).

Laubress is also working with a provincial organization that is interested in getting UMT Audit in healthcare organizations across the province to standardize sanitation inspections.

Read more about who is using UMT software, and for what at laubress.com/casestudies
